PROFESSIONAL SUMMARY

Frontend Developer with 3.8 years of experience building high-quality web and mobile applications using React.js, Next.js, and React Native, including feature delivery on the BHIM UPI app (100M+ users) at NPCI — a large-scale banking/fintech platform. Skilled in React.js, React Native, Android (Java), TypeScript/JavaScript, Redux/Redux Toolkit, REST API integration, and both web and mobile application architecture. Experienced in CI/CD pipelines, GitLab and Azure Repos-based version control, code quality enforcement via SonarQube, and unit testing with React Testing Library. Proven track record collaborating with product, design, and backend teams in Agile environments to deliver secure, scalable web and mobile solutions.

TECHNICAL SKILLS

- **Web Development:** React.js, Next.js (App Router), HTML5, CSS3
- **Mobile Development:** React Native (Android & iOS), Android (Java), iOS (Objective-C – basic)
- **Languages:** JavaScript (ES6+), TypeScript
- **State Management:** Redux, Redux Toolkit, Context API, React Hook Form
- **APIs & Integration:** REST APIs, JSON, Google Business Profile API, Instagram API
- **Testing & Code Quality:** React Testing Library, SonarQube
- **Tools & CI/CD:** Git, GitLab, Azure Boards, Azure Repos, CI/CD Pipelines, VS Code, Postman, Jira
- **Monitoring & Rollouts:** Sentry (crash monitoring), Flagsmith (feature flags)
- **UI & Styling:** Tailwind CSS, SCSS, Responsive Design, Figma to Code, Component-Driven Development
- **Databases:** Realm (MongoDB-based), SQLite, SQL

PROFESSIONAL EXPERIENCE

NPCI — Software Development Engineer, BHIM UPI App

January 2023 – February 2026

Mumbai, Maharashtra

- Achieved offline-first architecture using Realm offline database, enabling users to view 6 months of transaction history in both offline and online modes, along with offline interaction support across the BHIM app.
- Developed and maintained the BHIM UPI app (100M+ users on Play Store and App Store) across Android and iOS, delivering consistent performance and reliability at scale in a regulated banking/fintech environment.
- Built key product modules including UPI Credit Line, UPI Lite Tap & Pay (NFC), and Delegate Payments, launched at Global Fintech Festival 2023.
- Led the BHIM 4.0 redesign, modernizing UI/UX and improving security architecture; implemented coachmarks to guide new users through key interactions as part of the new launch experience.
- Managed state with Redux across Android and iOS; reduced login latency by 40% through async storage optimization and authentication flow refactoring.
- Set up and maintained CI/CD pipelines using GitLab, enforcing code quality standards with SonarQube; migrated unit tests to React Testing Library.
- Integrated Sentry for real-time crash monitoring and Flagsmith for feature flag-driven rollouts, improving release stability and production issue resolution.
- Worked on and built the Donations section within Bharat Bill Payments System (BBPS), enabling users to make donations through the BHIM app.
- Collaborated with product, design, and backend teams across UPI and BBPS domains in Agile sprints; conducted regular code reviews.
- Built an internal **React.js** dashboard for managing push notifications and in-app banners with role-based access for Product, Developer, and Admin users, using REST APIs for real-time campaign tracking.
- Implemented create, preview, schedule, and publish workflows in **React.js** using React Hook Form and Axios, integrating REST APIs for real-time campaign tracking.

Deloitte — Software Development Engineer

March 2026 – Present

Pune, Maharashtra

- Built and deployed a hyperlocal **React.js/Next.js** microsite for BPCL, generating SEO-optimized dynamic pages for 24,000+ retail petrol pumps and 3,000+ MAK server garages across India.
- Built responsive, accessible UI components using Tailwind CSS and SCSS from Figma designs, including the navbar, banner carousel, and outlet detail sections.
- Integrated Google Business Profile and Instagram APIs via REST to render real-time outlet data and social feeds on each location page.
- Developed an internal CMS admin portal in **React.js** for new petrol pump/garage listing creation, with a structured owner-submission and role-based admin review/approval workflow, and direct posting of approved listings to Google Business Profile (GBP).
- Used Azure Boards for work item tracking and Azure Repos (Git) for version control, collaborating cross-functionally in an Agile environment.

EDUCATION

Shivaji University — Bachelor of Technology in Computer Science

June 2018 – May 2022 | Kolhapur, Maharashtra

ACHIEVEMENTS & CERTIFICATIONS

- Received the Best Employee Award at NPCI twice: once for implementing offline-first architecture enabling offline login and transaction history, and once for outstanding contributions to the development and launch of BHIM 4.0.
- Winner, NPCI Java Coding Challenge (HackerRank, offline); awarded the Ninja Badge.
- Winner, NPCI React Coding Challenge, recognized for advanced front-end engineering expertise.
- Completed a Postgraduate Certification in Advanced Blockchain and Distributed Ledger Technologies.
